

ATTENDANCE FINE RULES

Penalties applied per period, per student

Fine schedule

The following fines apply to each period a student attends. A separate fine is charged for every period in which a violation occurs.

Situation	Condition	Fine
Came late	Arrived late but did NOT leave early	Rs 10
Left early	Left early but did NOT come late	Rs 15
Late & left early	Both came late AND left early	Rs 30
Full attendance	Present for the entire period	No fine

How fines are calculated

Each student is assessed across all 8 periods of the day. For every period:

If the student came late only, add Rs 10.

If the student left early only, add Rs 15.

If the student both came late and left early, add Rs 30.

If the student was present for the full period, no fine is added.

A student's total fine is the sum of all per-period fines across the eight periods. The total fine collected is the sum of every student's individual fine.

Worked example

A student who came late in two periods, left early in one period, and was late-and-early in one period would be fined:

$$(2 \times \text{Rs } 10) + (1 \times \text{Rs } 15) + (1 \times \text{Rs } 30) = \text{Rs } 65$$
